ABOUT ME

Over the past two years, my learning journey as a MERN stack developer has equipped me with the knowledge and skills needed to thrive in the ever-evolving world of web development. I have honed my expertise in MongoDB, Express.js, React, and Node.js, and I am proficient in using these technologies to build dynamic and responsive web applications.

SKILLS

- | | | | | | |
|--------------|------------|------------|--------------|------------------|------------|
| Languages: | Server: | Databases: | Framework: | Library: | ORM-ODM: |
| ▪ JavaScript | ▪ NGINX | ▪ MongoDB | ▪ Next.js | ▪ React.js | ▪ Prisma |
| ▪ Typescript | (learning) | ▪ Postgres | ▪ Express.js | ▪ Redux | ▪ Mongoose |
| | | | | ▪ Json web token | |
- **Front-end Proficiency:** I have become proficient in developing interactive and user-friendly interfaces using React.js and Next.js. I am well-versed in component-based architecture, state management with Redux, and responsive design, ensuring a seamless user experience.
 - **Back-end Mastery:** My journey has involved mastering Node.js and Express.js, enabling me to build robust and efficient server-side applications. I am skilled in routing, middleware, and database interactions, ensuring the smooth operation of applications.
 - **Database Expertise:** I have gained a deep understanding of MongoDB and Postgres, including data modeling, indexing, and querying, which allows me to create efficient and scalable databases for MERN and other stack application.
 - **RESTful API Development:** Crafting RESTful APIs has become second nature to me. I can design and implement APIs that seamlessly connect the front-end and back-end, facilitating data retrieval and manipulation.
 - **Authentication and Authorization:** Security is a top priority in web development. I have experience implementing user authentication and authorization systems, ensuring the protection of sensitive data and features.
 - **Version Control with Git:** I have honed my skills in version control using Git and GitHub, enabling effective collaboration with other developers and ensuring codebase stability.
 - **Deployment and Hosting:** My journey includes deploying MERN stack applications to various platforms like Heroku, AWS, and Vercel, and configuring servers and databases for production environments.
 - **Continual Learning:** I'm committed to staying up-to-date with the latest developments in the MERN stack and web development in general, through reading, online courses, and engagement with the developer community.
